

Solar Maximiser Service

Home battery technology allows energy generated by solar to be stored and used when needed, reducing electricity costs and your home's carbon footprint.

RIVERMARK'S SOLAR MAXIMISER SERVICE PROVIDES RESIDENTS WITH:

- A high quality 13.7 kWh home battery fully installed with no upfront or maintenance costs
- Opportunity for the typical household to move to over 90% renewable energy
- Net savings for the typical household of around \$200-300 per annum after services fees
- No exit costs if the Service is not delivering net savings to the household

Why Solar Maximiser?

REDUCE YOUR CARBON FOOTPRINT

The large 13.7kWh battery allows households to store excess solar energy during the day to help meet energy requirements in the morning, evening and overnight. This enables the typical household to meet over 90%^ of their total energy requirements from solar and reduce carbon emissions by 4-5 tonnes each year^.

A LARGE HIGH-QUALITY BATTERY WITH NO UPFRONT COSTS

Homeowners can benefit from a large, high quality battery that typically costs \$15,000 with no upfront or maintenance costs. This is made possible due to subsidies provided by the Rivermark Estate.

EASY TO USE APP

Homeowners can monitor their battery, electricity consumption and amount of carbon emissions reductions through a user-friendly mobile app.

SAVE ON YOUR ELECTRICITY BILLS

Storing and using more solar energy allows households to reduce the amount of electricity purchased from the grid. The typical household will save \$80-90^ per month on their electricity bill. With a monthly Service Fee of \$62.50*, the typical household will achieve net savings of around \$200-300 each year.

NO EXIT COSTS

Households can exit the Solar Maximiser Service at any time with no removal fee for households that don't experience net savings while participating in the Service.

HASSLE-FREE INSTALLATION AND SERVICING

There is no cost to you for installation and ongoing technical support and maintenance is covered by the monthly Service Fee.

POWERED BY HESPERIA

Hesperia is committed to maximising the benefits of renewable energy for all Rivermark homeowners, our community and our environment. This service is offered by Enpowered, part of Hesperia. For more information email hello@enpowered.com.au

* Normal price of \$125.00 per month for non Rivermark households. Residents must have at least 6.3kW of rooftop solar panels installed at their Rivermark home to opt into the Solar Maximiser Service. All pricing is inclusive of GST. Service fee commences from the date of installation of the battery. Terms and conditions apply.

^ Cost saving and environmental performance comparison based on Perth metro area typical household consumption of 20 units (kWh) of electricity per day. Actual savings and environmental performance achieved may differ based on actual household consumption and rooftop solar generation patterns. Monthly savings are average amounts and may vary throughout the year. The estimated carbon (CO2 equivalent) emissions reduction compares power consumed from solar, the battery and the grid with power consumed solely from the grid.
